The Vermont Department of Environmental Conservation's mission is to preserve, enhance, restore and conserve Vermont's natural resources and protect human health for the benefit of this and future generations.

Welcome to DEC | Department of Environmental Conservation

Excessive erosion and sedimentation from land disturbing activities has been linked to serious land and water management issues of concern to county residents. These concerns include the negative impacts on the biodiversity, quality of life, pollution and loss of water carrying capacity in local streams, and the protection of public health, safety and welfare.

Erosion Prevention and Sediment Control - MSD

Construction management (CM) is a professional service that uses specialized, project management techniques to oversee the planning, design, and construction of a project, from its beginning to its end. The purpose of CM is to control a project's time, cost and quality—sometimes referred to as a project's "triple constraint."

Construction management - Wikipedia

The Storm Water Technical Assistance Section assists local and state governments, developers, contractors, designers with controlling the negative impacts associated with new and existing development, including increased runoff, polluted storm water, stream erosion and loss of floodplain services.

Storm Water Management Technical Guidance - epa.ohio.gov

There are two common definitions of coastal erosion. First, coastal erosion is often defined as the loss or displacement of land along the coastline due to the action of waves, currents, tides, wind-driven water, waterborne ice, or other impacts of storms. This landward retreat of the shoreline is measured to a given datum over a temporal scale of tides, seasons, and other short-term cyclic ...
