LECTURE NOTE COURSE CODE-BCE 306 STRUCTURAL ANALYSIS 2

Computer science is the theory, experimentation, and engineering that form the basis for the design and use of computers. It involves the study of algorithms that process, store, and communicate digital information. A computer scientist specializes in the theory of computation and the design of computational systems. Its fields can be divided into a variety of theoretical and practical disciplines.

Computer science - Wikipedia

Seismic analysis is a subset of structural analysis and is the calculation of the response of a building (or nonbuilding) structure to earthquakes. It is part of the process of structural design, earthquake engineering or structural assessment and retrofit (see structural engineering) in regions where earthquakes are prevalent. As seen in the figure, a building has the potential to 'wave' back ...

ANOVA Analysis of variance and covariance Example 4: Two-way factorial ANOVA The classic two-way factorial ANOVA problem, at least as far as computer manuals are concerned, is a two-way ANOVA design from Azen (1979). Fifty-eight patients, each suffering from one of three different diseases, were randomly assigned
