economic sense to make this investment instead of purchasing the alternative energy technology. The purpose of these notes is to summarize the basic ideas of applying the concept of the time value of money to the economic analysis of engineering decision making.

Notes on Engineering Economic Analysis

The Seven Principles. Each of the seven principles of engineering economics moves you a step closer toward making an economics-related decision. The first two principles -- making a list of alternatives and identifying the differences between each alternative -- set up the thought process. The next three principles focus on evaluation criteria.
