Scientific realism is the view that the universe described by science is real regardless of how it may be interpreted.. Within philosophy of science, this view is often an answer to the question "how is the success of science to be explained?"The discussion on the success of science in this context centers primarily on the status of unobservable entities apparently talked about by scientific ...

The field of sociology itself—and sociological theory by extension—is relatively new. Both date back to the 18th and 19th centuries. The drastic social changes of that period, such as industrialization, urbanization, and the rise of democratic states caused particularly Western thinkers to become aware of society. The oldest sociological theories deal with broad historical processes ...
