At each level N, two entities at the communicating devices (layer N peers) exchange protocol data units (PDUs) by means of a layer N protocol. Each PDU contains a payload, called the service data unit (SDU), along with protocol-related headers or footers.. Data processing by two communicating OSI-compatible devices is done as such: The data to be transmitted is composed at the topmost layer of ...

### THE RELATIONSHIP BETWEEN WELL-STRUCTURED AND ILL

Definition. The term problem solving means slightly different things depending on the discipline. For instance, it is a mental process in psychology and a computerized process in computer science. There are two different types of problems, ill-defined and well-defined: different approaches are used for each.
