Waste water treatment is a process used to convert wastewater into an effluent that can be returned to the water cycle with minimum impact on the environment, or directly reused. The latter is called water reclamation because treated wastewater can then be used for other purposes. The treatment process takes place in a wastewater treatment plant (WWTP), often referred to as a Water Resource ...

Wastewater treatment - Wikipedia

What low-cost methods are available to remove TDS and related conductivity and alkalinity in wastewater? Nice to be in touch again but now on a different platform. I always appreciate your ...

What low-cost methods are available to remove TDS in

Wastewater quality indicators are laboratory test methodologies to assess suitability of wastewater for disposal or re-use. Tests selected and desired test results vary with the intended use or discharge location. Tests measure physical, chemical, and biological characteristics of the waste water.
