Inertia is the resistance, of any physical object, to any change in its velocity. This includes changes to the object's speed, or direction of motion.. An aspect of this property is the tendency of objects to keep moving in a straight line at a constant speed, when no forces are upon them”and this aspect in particular is also called inertia.

In physics, a force is said to do work if, when acting, there is a displacement of the point of application in the direction of the force. For example, when a ball is held above the ground and then dropped, the work done on the ball as it falls is equal to the weight of the ball (a force) multiplied by the distance to the ground (a displacement).
