Lecture 5 Vector Operators: Grad, Div and Curl In the first lecture of the second part of this course we move more to consider properties of fields. We introduce three field operators which reveal interesting collective field properties, viz. the gradient of a scalar field, the divergence of a vector field, and the curl of a vector field.

HM Schey's "Div, Grad, Curl, and All That" would be more helpful for vector calculus because Schey attaches Div, Grad, and Curl to their physical meaning in 3 dimensions. I read it when I was taking vector calc so that I could get an intuition for what div, grad, and curl do.
