A virus is a small infectious agent that replicates only inside the living cells of other organisms. Viruses can infect all types of life forms, from animals and plants to microorganisms, including bacteria and archaea.. Since Dmitri Ivanovsky's 1892 article describing a non-bacterial pathogen infecting tobacco plants, and the discovery of the tobacco mosaic virus by Martinus Beijerinck in 1898 ...

Play is essential to development because it contributes to the cognitive, physical, social, and emotional well-being of children and youth. Play also offers an ideal opportunity for parents to engage fully with their children. Despite the benefits derived from play for both children and parents, time for free play has been markedly reduced for some children.

Methane (CH<sub>4</sub>) is a potent greenhouse gas, and CH<sub>4</sub> emissions from human activities since preindustrial times are responsible for 0.97 W m<sup>-2</sup> of radiative forcing, as compared to 1.7 W m<sup>-2</sup> for carbon dioxide (CO<sub>2</sub>). CH<sub>4</sub> is removed from the atmosphere much more rapidly than CO<sub>2</sub>; thus, reducing CH<sub>4</sub> emissions can effectively reduce the near-term rate of warming.

The unemployment rate ended 2018 at just under 4%, substantially lower than most estimates of the natural rate. Could such an ostensibly tight labor market lead to a sharp pickup in wage growth from its recent moderate pace, such that the relationship between wage growth and unemployment is not always linear?

Different communities of gun policy experts have sharply divided views on many gun policies. But are there policies for which these differences are less stark, and might such findings reveal combinations of policies that experts of every stripe could agree on? RAND researchers surveyed nearly 100 gun policy experts to try to answer these questions.

A school shooting is an attack at an educational institution, such as a school or university, involving the use of a firearm(s). Incidents that involve four or more deaths are also categorized as mass shootings. According to studies, factors behind school shooting include family dysfunction, lack of family supervision, and mental illness.

In contrast, recent studies on ED and low sexual desire document a sharp increase in prevalence of such dysfunctions in men under 40. One clear demonstration of this phenomenon relates to ED, and compares very large samples, all of which were assessed using the same (yes/no) question about ED as part of the Global Study of Sexual Attitudes and Behavior (GSSAB).
