2. Autonomy vs. Shame and Doubt. Autonomy versus shame and doubt is the second stage of Erik Erikson's stages of psychosocial development. This stage occurs between the ages of 18 months to approximately 3 years.

Erik Erikson | Psychosocial Stages | Simply Psychology

Erikson's stages of psychosocial development, as articulated in the second half of the 20th century by Erik Erikson in collaboration with Joan Erikson, is a comprehensive psychoanalytic theory that identifies a series of eight stages that a healthy developing individual should pass through from infancy to late adulthood. Erikson's stage theory characterizes an individual advancing through the ...

Erikson's stages of psychosocial development - Wikipedia

Once described by a colleague as "Freud in sonnet form", [5] psychological giant Erik Erikson blurred the line between science and art. A prolific researcher best known for his model of human development as a series of eight stages, Erikson's long and abundantly rich life demonstrated a keen appreciation for the art of living. A look into the life and life's work of Erik Erikson reveals ...
