A charge-coupled device (CCD) is a device for the movement of electrical charge, usually from within the device to an area where the charge can be manipulated, for example conversion into a digital value. This is achieved by "shifting" the signals between stages within the device one at a time. CCDs move charge between capacitive bins in the device, with the shift allowing for the transfer of ...

An active-pixel sensor (APS) is an image sensor where each picture element ("pixel") has a photodetector and an active amplifier. There are many types of integrated circuit active pixel sensors including the complementary metal-oxide-semiconductor (CMOS) APS used most commonly in cell phone cameras, web cameras, most digital pocket cameras since 2010, in most digital single-lens reflex ...

Overview. The CMV-120 is a rolling shutter CMOS digital camera with an astounding 120 million pixels. The CMV-120 offers outstanding quality by using the Canon 120MXSM and 120MXSC sensors in APS-H format.

Wavefront Sensors. Our wavefront sensor systems include: FrontSurfer stand-alone software for Windows or

Linux. The program reconstructs the wavefront from a spot pattern obtained with hexagonal, orthogonal or random Hartmann (-Shack) mask with arbitrary number of subapertures.

Digitimes overviews 2018 Far East semiconductor industry and emphasize Samsung impact on CIS market: "With use of CMOS image sensors (CIS) extending from smartphone cameras to automotive cameras, Samsung has planned to expand its CIS production capacity to surpass Sony to become the globally largest supplier. Samsung began to modify Line 11 DRAM factory in its Hwaseong production base for ...

Die meisten CCD-Sensoren sind FIÄschensensoren zur Aufnahme von Bildern. Dort wird fÄ¼r das Auslesen des Sensors die zwischengespeicherte Ladung der Photodioden in das vertikale CCD (vertikales Schieberegister) Ä¼bernommen, dann mit der Zeilenfrequenz vertikal verschoben.
