The GGobi Book. Interactive and Dynamic Graphics for Data Analysis: With Examples Using R and GGobi. Dianne Cook and Deborah F. Swayne

Interactive and Dynamic Graphics for Data Analysis - GGobi

Data analysis is a process of inspecting, cleansing, transforming, and modeling data with the goal of discovering useful information, informing conclusions, and supporting decision-making. Data analysis has multiple facets and approaches, encompassing diverse techniques under a variety of names, while being used in different business, science, and social science domains.

Data analysis - Wikipedia

Cluster analysis or clustering is the task of grouping a set of objects in such a way that objects in the same group (called a cluster) are more similar (in some sense) to each other than to those in other groups (clusters). It is a main task of exploratory data mining, and a common technique for statistical data analysis, used in many fields, including machine learning, pattern recognition ...

Get an overview of hierarchical data, learn what the GraphX Pregel API is, and learn how to process hierarchical data using the Spark GraphX Pregel API.

Processing Hierarchical Data Using Spark GraphX Pregel API

Python Data Analysis Library (pandas) is an open source, BSD-licensed library providing high-performance, easy-to-use data structures and data analysis tools for the Python programming language.. pandas is a NumFOCUS sponsored project. This will help ensure the success of development of pandas as a world-class open-source project, and makes it possible to donate to the project.

Analyzing Qualitative Data: With or without software

Hierarchical Clustering Introduction to Hierarchical Clustering. Hierarchical clustering groups data over a variety of scales by creating a cluster tree or dendrogram. The tree is not a single set of clusters, but rather a multilevel hierarchy, where clusters at one level are joined as clusters at the next level.

2.2. Big Data analytical methods " related to Q2. To facilitate evidence-based decision-making, organizations need efficient methods to process large volumes of assorted data into meaningful comprehensions (Gandomi & Haider, 2015). The potentials of using BD are endless but restricted by the availability of technologies, tools and skills available for BDA.

Critical analysis of Big Data challenges and analytical

The purpose of this page is to provide resources in the rapidly growing area of computer-based statistical data analysis. This site provides a web-enhanced course on various topics in statistical data analysis, including SPSS and SAS program listings and introductory routines. Topics include questionnaire design and survey sampling, forecasting techniques, computational tools and demonstrations.
