Emergency evacuation is the urgent immediate egress or escape of people away from an area that contains an imminent threat, an ongoing threat or a hazard to lives or property.. Examples range from the small-scale evacuation of a building due to a storm or fire to the large-scale evacuation of a city because of a flood, bombardment or approaching weather system.

The magic SysRq key is a key combination understood by the Linux kernel, which allows the user to perform various low-level commands regardless of the system's state. It is often used to recover from freezes, or to reboot a computer without corrupting the filesystem. Its effect is similar to the computer's hardware reset button (or power switch) but with many more options and much more control.

This is a theme that requires a lot of planning and partnering with other organizations. I have been a part of an Emergency Services camp where members of the fire department, police department, Marine Corp, and Search and Rescue ran the core activities. This week of camp was for inner city high school students looking to explore these avenues for future careers.
