The Heckscher–Ohlin model (H–O model) is a general equilibrium mathematical model of international trade, developed by Eli Heckscher and Bertil Ohlin at the Stockholm School of Economics. It builds on David Ricardo's theory of comparative advantage by predicting patterns of commerce and production based on the factor endowments of a trading region. The model essentially says that countries ...

Japanese used vehicle exporting is a grey market international trade involving the export of used cars and other vehicles from Japan to other markets around the world since the 1980s.. Despite the high cost of transport, the sale of used cars and other vehicles to other countries is still profitable due to the relatively low cost and good condition of the vehicles being purchased.
