Martindale's Calculators On-Line Center: Mechanical

The heat transfer coefficient or film coefficient, or film effectiveness, in thermodynamics and in mechanics is the proportionality constant between the heat flux and the thermodynamic driving force for the flow of heat (i.e., the temperature difference, ΔT): . The overall heat transfer rate for combined modes is usually

expressed in terms of an overall conductance or heat transfer ...

Heat transfer coefficient - Wikipedia

Comprehensive reference page for all chapters of the Fundamentals of Environmental Measurements. Please see individual pages for the information.

References - Environmental Measurement Systems

Heat transfer is a discipline of thermal engineering that concerns the generation, use, conversion, and exchange of thermal energy between physical systems. Heat transfer is classified into various mechanisms, such as thermal conduction, thermal convection, thermal radiation, and transfer of energy by phase changes. Engineers also consider the transfer of mass of differing chemical species ...
